

Learning Entities

15 item(s)

ID	Text	Category	Subcategory	Topic	Subtopic	Concept	Tags	Aliases
1	How does @Transactional work internally Update?	Spring boot	Transaction Management	@Transactional	Internal Working	Transaction Management	Spring, Transactions, @Transactional, Transaction Management, backend	
2	Why does @Transactional sometimes not work Update ?	Spring boot	Transaction Management	@Transactional	Common Issues	Transaction Proxying	Spring, Transactions, @Transactional, Troubleshooting, backend	• How does @Transactional work internally Update?
3	What exceptions trigger transaction rollback?	Spring boot	Transaction Management	Transaction Rollback	Rollback Rules	Exception Handling	Spring, Transactions, Rollback, Exceptions	
4	What is the difference between REQUIRED and REQUIRES_NEW transaction propagation?	Spring boot	Transaction Management	Transaction Propagation	REQUIRED vs REQUIRES_NEW	Propagation Behavior	Spring, Transactions, Propagation, REQUIRED, REQUIRES_NEW	
5	What are the different transaction propagation types in Spring?	Spring boot	Transaction Management	Transaction Propagation	Propagation Types	Propagation Behavior	Spring, Transactions, Propagation, Transaction Management	
6	What is transaction isolation?	Database Transactions	Transaction Isolation	Isolation	Fundamentals	Transaction Isolation	Transactions, Database, Isolation, Concurrency	
7	What are the different transaction isolation levels?	Database Transactions	Transaction Isolation	Isolation Levels	Isolation Level Types	Concurrency Control	Transactions, Database, Isolation Levels, Concurrency Control	
8	What causes dirty reads?	Database Transactions	Transaction Isolation	Dirty Read	Concurrency Anomalies	Uncommitted Data	Transactions, Database, Dirty Reads, Concurrency	

Learning Entities

ID	Text	Category	Subcategory	Topic	Subtopic	Concept	Tags	Aliases
9	What causes phantom reads?	Database Transactions	Transaction Isolation	Phantom Read	Concurrency Anomalies	Changing Result Sets	Transactions, Database, Phantom Reads, Concurrency	
10	Why should API calls be avoided inside transactions?	Spring 4	Transaction Management	Transaction Boundaries	External API Calls	Transaction Duration	Spring, Transactions, API Calls, Transaction Boundaries	
11	What happens during nested transactions?	Spring 4	Transaction Management	Nested Transactions	Transaction Behavior	Nested Transaction Handling	Spring, Transactions, Nested Transactions, Transaction Management	
12	What is transaction synchronization?	Spring 4	Transaction Management	Transaction Synchronization	Transaction Lifecycle	Transaction Callbacks	Spring, Transactions, Transaction Synchronization, Lifecycle	
13	How do you debug transaction issues?	Spring 4	Transaction Management	Transaction Troubleshooting	Debugging	Transaction Issues	Spring, Transactions, Debugging, Troubleshooting	
14	What is the self-invocation problem with @Transactional?	Spring 4	Transaction Management	@Transactional	Self-Invocation	Proxy Limitation	Spring, Transactions, @Transactional, Self-Invocation, Proxies	
15	How does Spring use proxies for transaction management?	Spring 4	Transaction Management	@Transactional	Proxy-Based Management	AOP Proxies	Spring, Transactions, @Transactional, Proxies, AOP
